

RC(S) Ammunition Security & Disposal

Ammunition regardless of type must be properly disposed of. This includes everything from small arms up to high explosives. Even shell casings, brass and items rendered “safe” must be turned in through proper channels. Failure to properly dispose of these items places all personnel at risk and can arm the enemy.

- All trash on KAF is hand sorted. Trash from other locations is either removed by Afghan companies and burned or buried.
- Remember what you throw away today is in the enemies hands tomorrow.
- The items below have been found in the trash and left in vehicles that were turned in.

RC(S) Ammunition Security & Disposal

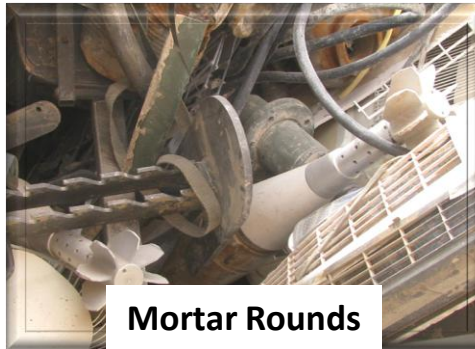

Ammunition regardless of type must be properly disposed of. This includes everything from small arms up to high explosives. Even shell casings, brass and items rendered “safe” must be turned in through proper channels. Failure to properly dispose of these items places all personnel at risk and can arm the enemy.

- All trash on KAF is hand sorted. Trash from other locations is either removed by Afghan companies and burned or buried.
- Remember what you throw away today is in the enemies hands tomorrow.

Note:

- All units must have an amnesty program in place.
- All personnel can drop off ammunition at any amnesty point without penalty.
- HE rounds must be taken to the ASP or returned directly to ammunition personnel.
- Units must account for and turn in all ammunition. Procedures are in place to simplify this process and the amnesty program is not designed to circumvent proper procedures.

Contact Information:

- KAF ASP will take amnesty items with no questions asked. Contact: 318-420-4151 to schedule a time for unit turn in of larger quantities.
- Contact QASAS prior to unit turn in. Contact: 318-421-8499
- Your unit S4 or ammunition qualified personnel.
